

## Scoring Key for the CAPES

**Child Emotional and Behavioural Problems Scale:** 27 items (rating scale 0–3). Note that shaded items (in bold) must be reverse scored (i.e. 0=3, 1=2, 2=1, 3=0). To obtain an *Emotional Problems Subscale Score*, sum items 3, 11, 18, with a possible range from 0-9. To obtain a *Behavioural Problems Subscale Score* sum all remaining items, with a possible range from 0-72. To obtain a *Total Intensity Score* add the *Emotional Problems Subscale* and the *Behavioural Problems Subscale Scores* together, with a possible range from 0-81. Higher scores indicate greater levels of child emotional or behavioural problems.

**Parent Efficacy Scale:** sum all parent confidence ratings for items 1-19 (rating scale 1–10). Note that there are no parent confidence ratings for shaded items. Possible range for the *Total Score* is 19–190, with higher scores indicating greater levels of parent efficacy.
